Portfolio | Salem, Tamil Nadu

OBJECTIVE

Flutter Developer with 1 year of experience in building scalable and high-performance mobile applications. Skilled in designing responsive UI, implementing state management solutions, and integrating RESTful APIs. Focused on delivering intuitive user experiences, optimizing performance, and writing clean, maintainable code.

EDUCATION

Mahendra Institute of Engineering & Technology — **Namakkal,TamilNadu**
Bachelor of Engineering in Computer Science & Engineering (BE.CSE) - CGPA – 8.04 — Graduated, 06/2024

Jspider Training Institute — **Bengaluru,Karnataka**
Java Full Stack - Course — Completed, 03/2025

SKILLS

Programming : Java, Python, Dart

Web Technology : Html , Css & Javascript

FrameWork: SpringBoot , Hibernate, Flutter

DataBase : SQL Oracle 10G , MySql

EXPERIENCE

Flutter Developer | Macincode Technologies

April 2025 – Present (Full Time , 1+ Years)

- Developed scalable cross-platform mobile applications using Flutter with a focus on performance and responsiveness.
- Created visually engaging and intuitive UI/UX with animations, gradients, and modern design patterns.
- Implemented real-time features, interactive components, and smooth navigation flows to improve user engagement.
- Integrated and handled REST APIs, including error handling and data management.
- Managed application state effectively using GetX for clean and maintainable architecture.
- Improved app performance through code optimization and efficient widget usage.
- Worked closely with cross-functional teams to deliver high-quality product features on time.

PROJECTS

Dotzza - Mobile Application

- Developed a cross-platform mobile application for a collaborative project management platform focused on healthcare education and student workflows.
- Designed and implemented responsive and intuitive UI screens to enhance usability and user engagement.
- Built task management interfaces allowing users to create, organize, and track assigned tasks efficiently.
- Implemented dynamic UI components such as progress tracking, task status indicators, interactive workflow and Integrated backend APIs to handle task data, user interactions, and real-time updates.

- Contributed to improving user experience by ensuring smooth navigation and clean UI architecture.
- Collaborated with the backend team to support AI-based task generation features within the application

Rugby Management – Ipad (Ios)Application

- Engineered a tablet-optimized Flutter application for real-time rugby match event management, ensuring high performance and reliability during live gameplay.
- Designed and implemented adaptive, tablet-first UI to enhance usability for referees and match officials.
- Built complex rule-driven workflows to manage match events including Scrum, Lineout, Penalty, Knock-on, Restart, and Drop Goal scenarios.
- Developed an interactive pitch visualization using coordinate-based logic with enforced field constraints and positioning rules.
- Implemented scalable architecture using GetX for efficient state management and maintainable code structure.
- Improved user experience through seamless navigation aligned with real-time match flow and decision-making.

FiniClub – Mobile Application

- Developed UI components for a financial education platform offering structured learning, insights, and user engagement features.
- Designed intuitive and responsive interfaces for dashboards, course modules, and content-driven screens.
- Improved user experience by enhancing navigation flow and simplifying access to financial learning resources.
- Integrated REST APIs to manage user data, course content, and platform interactions.
- Ensured consistency in design and optimized UI performance across both Android and iOS platforms.
- Worked collaboratively to deliver a clean, scalable, and user-centric mobile experience.

Lotto23 – Mobile Application

- Developed a scalable lottery-based mobile application with real-time ticket booking, jackpot tracking, and interactive user experience.
- Built highly engaging UI featuring countdown timers, progress indicators, and dynamic ticket availability updates.
- Integrated secure payment gateway for seamless in-app transactions.
- Designed and implemented a wallet-based system enabling users to add funds, purchase tickets, and manage transaction history.
- Developed withdrawal functionality allowing users to securely transfer winnings to their bank accounts.
- Implemented end-to-end ticketing logic including purchase flow, prize calculation, and user participation tracking.
- Integrated RESTful APIs for real-time synchronization and efficient data handling.
- Improved app performance and ensured smooth navigation with optimized Flutter components.

Closps Brand – Mobile Application

- Implemented UI enhancements to improve overall user experience, ensuring a more intuitive and visually consistent interface.
- Integrated Google Sign-In authentication to enable secure and seamless user login.
- Developed and implemented biometric authentication (fingerprint login) to enhance app security and user convenience.
- Improved app usability by refining navigation flow and optimizing UI responsiveness across devices.

- Collaborated with the development team to ensure smooth integration of new features with existing application architecture.

WitteHms – Mobile Application

- Developed a dental care management mobile application supporting role-based workflows for patients, dentists, and clinic staff.
- Implemented appointment scheduling system enabling patients to book, manage, and track consultations efficiently.
- Designed intuitive and role-specific UI to streamline interactions between patients and healthcare providers.
- Integrated RESTful APIs for managing user data, appointments, and workflow operations.
- Built structured navigation and interaction flows to improve operational efficiency within the application.
- Ensured responsive design and consistent performance across Android and iOS devices.

Skool Deck – Mobile Application

- Redesigned and modernized a legacy school management application by upgrading outdated UI to a clean and intuitive interface.
- Improved user experience for parents and staff by enhancing task management and communication flows.
- Applied modern UI design principles including better layout structure, spacing, and visual consistency.
- Increased usability and readability by simplifying navigation and improving screen organization.
- Ensured responsive and consistent design across various devices.
